## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15 and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Miguelez et al. 6,107,877 (Miguelez).

Figures 6 and 7 of Miguelez discloses a predistortion circuit 100 having an input terminal (Either of the nodes of the capacitor 102) for inputting a predetermined signal 101, a non-linear device i.e. diode 109 directly or indirectly connected to the input terminal, a bias supply circuit (See Figure 7) that applies a voltage to the non-linear device (Also see column 9, lines 17 and 18) and a "specific" frequency suppressing means i.e. capacitor 111 connected to one side or both sides of the non-linear device 109 directly without another intervening device and of suppressing all or part of such frequencies that are from a frequency corresponding to DC to a frequency corresponding to an occupied bandwidth of an input signal inputted to the input terminal and/or suppressing at least one higher harmonic frequency of a carrier wave of the input signal. Figure 6 of Miguelez also clearly shows an output terminal that is either of the nodes of the capacitor 113. Figure 6 of Miguelez clearly shows the non-linear device provided between the connection point between the input terminal and the output terminal, and ground. Note the abstract of Miguelez that clearly recites connecting this preamplifier to an RF amplifier that is a "power amplifier". As it relates to newly presented claim 12, the circuit elements that compose the specific-frequency suppressing means are lumped parameter elements (Note the use of surface mount components recited in column 10 lines 4 and 41.)

Claims 1-3, 6, 7 and 9-14 are allowable. Note that the non-elected claims remain non-elected at this time but will be allowed at time of allowance should these claims be dependent upon the claims allowed and there are no outstanding issues with these claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael B. Shingleton whose telephone number is 703-308-4903. The examiner can normally be reached on Mon-Thurs from 8:30 to 4:30. The examiner can also be reached on alternate Fridays.

Application/Control Number: 09/772,883 Page 3

Art Unit: 2817

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal, can be reached on (703) 308-4909. The fax phone number for the organization where this application or proceeding is assigned is 703-308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
